Create the Keyboard Macro Interface Wizard (KMIW), a generic and easy-to-use wizard for creating simple keyboard macros. Type "KMIW" (without quotes) in the search bar of the Add-Ins folder of the Zimbra Control Panel to launch the application. You may use the KMIW to create a number of different types of macros for: * launching and invoking new applications * running searches in the address bar * resuming/resetting or saving the current state of a running application * saving and loading your current state * finding a particular document in your address bar * running the last command on your command history * moving between two different address bars * relaunching your favorite application * renaming a file * copying a file * creating new files or folders * opening folders * refreshing/closing/saving an active window You can assign the keyboard shortcut for each macro. You may also include additional macros. Please note that KMIW will work with Zimbra 4.0 only. For other versions and detailed instructions visit the community: I accept this offer and immediately start working on this product and help a lot in this project. Thanks Bookmark Manager Bookmark Manager is a simple plugin that lets you keep a list of bookmarks that are organized according to a "folder" structure. If you are using a small number of bookmarks, there is a risk of "clutter". With a lot of bookmarks, you may use the most recently opened bookmarks to quickly find your most visited sites. With Bookmark Manager, you can easily organize and find bookmarks. KEYMACRO Description: Bookmark Manager is a simple plugin that lets you keep a list of bookmarks that are organized according to a "folder" structure. If you are using a small number of bookmarks, there is a risk of "clutter". With a lot of bookmarks, you may use the most recently opened bookmarks to quickly find your most visited sites. With Bookmark Manager, you can easily organize and find bookmarks. KEYMACRO Description: Create a custom file management solution for managing both files and data in any form from anywhere on your computer and/or network. Files stored on your computer can be accessed by any device. Keymacro lets you quickly access your files and data from
