At the end of diffusion time, the skin was excised and the receiver fluid was drained and replaced by fresh medium. The experiments were performed in triplicate. The skin was cut into small pieces and the amount of drug permeated was determined by HPLC. \*In vivo\* permeation study [#s0008] ----- \*In vivo\*

The letter was described as a fundraising effort. The state subpoenaed the letter, along with many other related documents, and is trying to determine what exactly was discussed at the time of the decision. "We are confident we have evidence that the decision was made as part of an illegal, coordinated effort with S&P," a spokesman for Attorney General Eric Schneiderman told ABC News. But on Wednesday, a spokesman for S&P and the McGraw-Hill Companies released a statement calling the state's allegations baseless and saying that "there was no intent to mislead or manipulate the investment community." "S&P has a long-standing policy of cooperating with authorities conducting investigations and pursuing justice for wrongdoing... At no time did S&P deviate from this policy, nor did McGraw-Hill," the statement read. The lawsuit asks for damages and that S&P be barred from receiving future business from the state. A spokesman for S&P and the McGraw-Hill Companies said the state has not contacted them since issuing the lawsuit, but in December, the state subpoenaed the company for more information about the internal communications and staff activities that occurred in relation to the IPO. "We believe it's inappropriate to discuss any of the issues that the state of New York is pursuing in an open 2d92ce491b
