Lectures by Ron Williams on DVD 3, The Teachings of The Masters from Bob's various seminar programs . the seminar is an excellent foundation for developing and strengthening your financial awareness. I highly recommend this product! So will I do the seminar? These are the 3 options you have to get access to Bob Proctor's seminar programs: . and I have chosen this seminar because I believe it is the one that best fits my needs at this time in my life. I will not be able to continue to pay monthly for the many CDs and the seminar at the same time. I can only afford to do 1 at a time. This would be the best choice for people who want to do the seminar but also have financial concerns because this option would make the payment schedule more affordable. I would strongly recommend this option for anyone who does not have the money to pay monthly and also is interested in the material. This program has made an impression on me because it is one of the first seminars that I have done and it was a great experience for me. . If you choose to do this seminar but are unable to attend the seminar, you can still get access to all Bob's audio programs for 6 months, thanks to The Dynamic Alliance. . By: Eric By: Eric (These photos were taken by Eric) It's a great day for the motorsports enthusiast. Remember days when you could sit in your car for five to eight hours and not get a ticket? Or, could you go to the track and actually see people racing on the same track that you saw on TV? That was the era of high school racing before the 80's when you could get into a car and go to the racetrack for a few hours and drive on the racetrack without having to pass a ticket counter or guard booth. When I first got into racing in 1983, there were only a few minor changes from the early 80's. The early 2000's brought the TV screens, which made watching the races on TV just as easy as watching a race on the track. As the years went on, some rules changes, such as the safety cars, have made watching the races on TV just as easy as watching on the track. Those safety cars are what caused the biggest changes in the 1980's. Since the introduction of 2d92ce491b
