The potency of ovine and bovine estradiol for the induction of vaginal cornification and of spontaneous ovulation were assessed. It was shown that a change in the flourochrome used did not affect the potency of these estrogens. In a pharmacological study the effect of the intravaginal application of estradiol-17 beta at doses of 100, 600 or 1000 micrograms in the rat was investigated. The results indicate that the 600-micrograms dose was the most effective.India's National Commission for Women has called on the government to ban the use of the menstrual cup and provide a permanent replacement with sanitary pads, countrywide. Emmeline Levesque, the head of the commission's menstrual products committee, called on the Indian government in March to meet the needs of women by providing "permanent and hygienic" alternatives to the disposable cup. The reusable menstrual cup has been gaining popularity in the US and has been advertised as an eco-friendly option. But it's not without controversy, as it can be uncomfortable, and there have been reports of health problems and adverse reactions to its usage. The makers of the cup argued that it has the same effect as tampons or pads when inserted properly, but in contrast, the cup industry says claims it is "flushable" are false. A 2016 peer-reviewed scientific study found that menstrual cups are "no more 3da54e8ca3
