SecurSurf Crack+ License Key Full Free Download

This software has a real-time macro engine with more than 250 working keys. And...what else? SecurSurf is a FREEWARE program. With SecurSurf you can surf the web anonymously and still protect the websites you visit. You can use SecurSurf while the screen is on, while a program is running, or while the computer is sleeping. You can get a unique IP address from our secure server, and you can get this address as many times as you need. Our anonymous and secure server uses SSH Protocol which is a technology to protect the data exchange between the computer and our server. It is very safe because it does not reveal your real IP number. Please contact the author if you need any information: gfi@gfi.net If you need our software support, you can contact us on the following address: gfi@gfi.net Description: The internet is a public domain. No one knows more about "surfing" and downloading habits than your ISP (Internet Service Provider). The ISP is able to know who you are, every site you visit, every page you view, and every file you download. How this happens? Every time you are connected on the Internet your ISP gives you an IP number that is a unique address which identifies you from the other computers on the network living you vunerable to any attacks from hackers or eavesdroppers. Secursurf was created to protect you from those problems. SecurSurf is a small, simple yet powerful and reliablesoftware that allows the user to get totally anonymous and at the same time protects the data exchange on the Internet. The software provides a direct encrypted link(by using SSH Protocol) with one of the world wide SecurStar high bandwidth security proxy servers. "SSH protocol (Secure Shell protocol)" which makes the connection encrypted from your personal computer to any website. A protocol says which format the data is going to be sent and which rules will be applied. The SSH protocol creates a "virtual tunnel", in such a way you are totally invisible from any kind of monitoring. If someone tries to track your IP number, it will recognize only our SecurStar server's IP, so it would be impossible to track your personal IP number. The SecurSurf also provides free e-mail account (no mailbox size limit). Sending emails from it will not reveal your personal IP number. At the moment Sec 1d6a3396d6

SecurSurf

---------------------------------- SecurSurf aims to create a better internet by bringing more freedom of information to the people, and a safe way of surfing on the internet. When someone accesses a website they have little to no idea what the site is about or who is hosting it. In the case of file sharing SecurSurf brings more safety to the user. The user downloads files anonymously and through a very easy to use interface. Users of SecurSurf can also get free e-mail and you can use it for any purpose you want, even for illegal activities. You can be sure that if you are using e-mail addresses that are associated with the name on the account, the mail will be safely delivered. No one can get your e-mail information with the use of SecurSurf Why SecurSurf? ------------------------------- The internet has become a big place for advertisement, especially for filesharing programs. Most people would agree that it is not acceptable to download files that you don't know what the software is for or what it will do. Even if it is legal, it is no longer safe to use. If you have the intention of downloading files that can be used in illegal activities, they are useless because there is a risk of getting caught. When you are downloading files you can find some content you don't like. Most of the time it is because the site is not reliable or maybe they are trying to infringe on your privacy. SecurSurf solves all these problems and more. It brings more freedom to the user. Features: ----------------------------------- 1. Anonymous Download It is very easy to download anonymously. Downloading from the site that you find may be unsafe. Using the download manager SecurSurf is safe. 2. Encrypted Connection SSH protocol(the encrypted protocol) is used. 3. Speed SecurSurf provides a very fast transfer of data. 4. No Downloads Limit The software allows downloading unlimited amounts of files. 5. Free E-Mail The e-mail provided is free and anyone can use it. 6. Encryption SecurSurf uses encryption on all its connections. SecurSurf's Team: --------------------------------- "SecurSurf" is a team of 3 developers which includes the founder and project manager "Piers Cobb". SecurStar: --------------------------------- We aim to provide the best infrastructure available for SecurSurf users

What's New in the?

SecurSurf is a simple and powerful software, the users around the world can share one single IP address and the information that is exchanged is protected from prying eyes. SecurSurf is a small, simple yet powerful and reliable software that is perfect for people who don't want to be tracked by some monitoring software that are available in the market. This software is by far the most secure software available in the market today and probably one of the best product available on the market today. All information that is sent and received is protected from prying eyes. This is possible because of the fact that this software will create a "virtual tunnel" by using the SSH (Secure Shell) protocol. This is an encryption protocol used by all of the computers and is normally used in a trusted connection between two computers. When using SSH you are totally invisible from any kind of monitoring. This software provides a direct encrypted link(by using SSH Protocol) with one of the world wide SecurStar high bandwidth security proxy servers. If someone tries to track your IP number, it will recognize only our SecurStar server's IP, so it would be impossible to track your personal IP number. With this software you can protect yourself from the problems which are coming out by some man in the middle attacks(some kind of attack that will deceive you to believe you are on a site you are not using). The software provides you a proxy, and all the connections between you and the sites that you visit will be redirected through that proxy. No one can find out your IP number, because only the proxy is working in direct connection between you and the sites you visit. After the purchase, you will be able to choose from our five proxy servers available. This will be explained in the FAQ part of the software. The main functions of SecurSurf are: - 100% free software - If you have purchased the software, then you will have 5 proxy servers available. - It is perfect for people who are not willing to be monitored by some kind of monitoring software. - It is available in Free, Freeware and Trial versions. - As this software is totally free to use, there is no need for "activation key". - No limit in mailbox size - You can send and receive unlimited emails by purchasing the "mail box" size - The mails sent by this software are 100% encrypted With SecurSurf you will be able to get completely anonymous from your ISP and the traffic on the Internet. SecurSurf Copyright notice: All of our products are copyright protected. This product is not re-distributed for FREE. This product is for use by Individuals, or if you are an ISP you need to purchase the PRO version of the software. ** Many thanks for your purchase on our software. ** Please
